

Remarks:

Applicant notes the Examiner's indication of allowance of claim 16-18 and 20. The applicant has made the requested amendment to claims 16 and 20 to ensure correspondence with the language used in the specification.

Applicant has cancelled the rejected claims 1-6, 8-12, and 14-15.

Applicant has added new claims 21-25 that applicant believes are allowable on the same basis as claim 16. Claim 16 is addressed to a kit containing certain elements. Those elements are adapted to be combined in a given environment in a specified manner. New claim 21 affirmatively claims the combination of the same elements in that environment. The dependent claims 22-25 merely characterize one or more of the elements of the combination. Claim 22 corresponds generally to original claim 17. Claim 23 corresponds generally to original claim 2. Claims 24 and 25 correspond generally to claims 14 and 15.

This amendment has cancelled all previously rejected claims and now advances only claims believed to be allowable based on the previous indication of allowable subject matter. Applicant therefore requests that upon reconsideration the present application be allowed and passed to issue. In the event there are outstanding issues needing resolution, the subscribing attorney of record would welcome a telephone conference with the Examiner.

Respectfully submitted,

A. James Richardson
